

Portland Public Schools
**ENVIRONMENTAL HEALTH &
SAFETY UPDATE**
September 27, 2016 Board Presentation

Courtney Wilton / John Burnham / Joe Crelier
Interim Executive Director of Operations / Interim Senior
Director of Environmental Health and Safety / Program
Director - Risk Management
cwilton@pps.net / jburnham@pps.net / jcrelier@pps.net

This slide features a background of horizontal stripes in shades of green, blue, and cyan. The text is centered and includes the organization's name, the title of the update, the date of the presentation, and the names and titles of the presenters. Contact information is provided at the bottom.

Agenda

- Recap of Lead Management Status
- Recap of Other Ongoing Environmental Activities
- Environmental Health and Safety Long Term Needs

This slide features a background of horizontal stripes in shades of green, blue, and cyan. The word "Agenda" is centered at the top. Below it, three bullet points list the topics to be discussed: "Recap of Lead Management Status", "Recap of Other Ongoing Environmental Activities", and "Environmental Health and Safety Long Term Needs".

Lead Management Status

Water Fixture Testing Results "A" Samples*

Cold Water Fixtures	Tested	Elevated Lead ***	% of elevated lead
Drinking Fountains	2,017	243	12%
Other fixtures **	8,786	3,384	39%
All Fixtures	10,803	3,627	34%

* Testing is nearly complete with exception of a few missed during first go around.
**Federal lead standard applies to drinking water and food preparation only – very little if any lead is absorbed through skin so mitigation of these type fixtures will likely be limited.
*** We also tested for copper and a small number of fixtures (3%) recorded elevated levels

Blood / Lead Screening Results (through 9/26/16)

Multnomah County	Screened	Elevated Level	% of elevated lead
Students	519	2	0.4%
Staff	0	0	0.0%
Subtotal	519	2	0.4%
On Site Clinics (Kadalyst)			
Students	1273	14	1.1%
Staff	658	11	1.7%
Subtotal	1931	25	1.3%
Mail Kits (ZRT)			
Mailed	1565		
Returned	716	1	0.1%
Total Tested	3166	28	0.9%

Note: Subsequent follow up testing by county has reduced number considerably. To date, no notification from county that cause was PPS.

Lead in Water – progress being made

- **Highlights:**
- Fixture testing 99.9% complete
- Blood screening also almost complete
- Bottled water system is working
- Do Not Drink signage added districtwide
- Finalizing phase 1 of water system analysis
- Kitchens back to regular operations October 3rd

Leadin Water Work plan

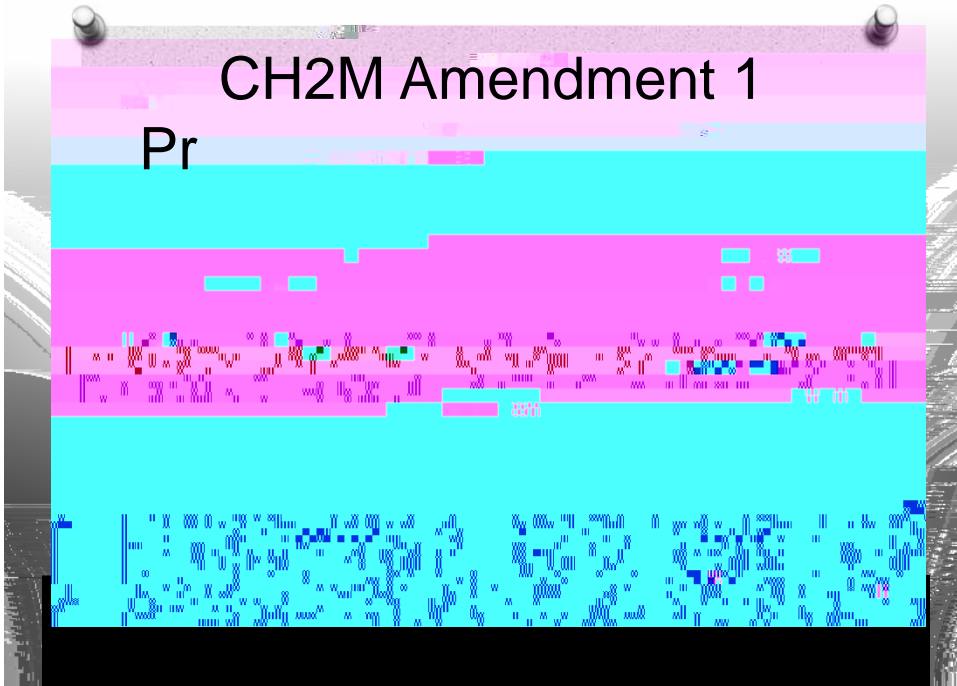

Water	Done	In Progress	To/Do
Cold water fixture testing at all schools	X		
Phase 1 of water consulting analysis	X		
Decommission all drinking fountains / shut valves / remove plastic	X		
Establish bottled water system at all schools	X		
Do Not Drink signage on all non drinking fixture rooms	X		
Additional kitchen sink testing and analysis	X		
Label and release kitchen sinks for operation with flush protocol	X		
Release various career tech. classrooms and gardens		X	
Final water test report along with fixture maps		X	
Analysis of B samples		X	
Phase 2 of water consulting analysis		X	
Measure and release of food fountains			X
Sink fixture replacements			X
Fountain replacements			X

Change to CH2M Consulting Scope

- Changes since original proposal 6/13/16 \$1m:
- 1. Broke into phase 1 and planned phase 2
- 2. Changes and Mostly Reduced Scope
-

CH2M Amendment 1

Pr

Lead Paint Management

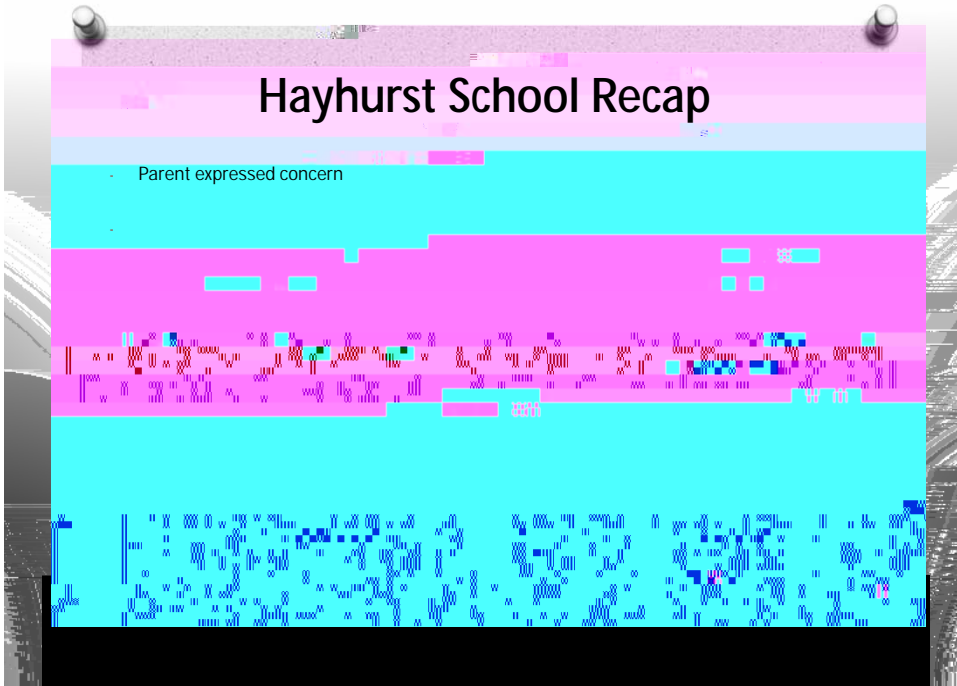

- Paint abatement and encapsulation work completed at around forty schools over summer

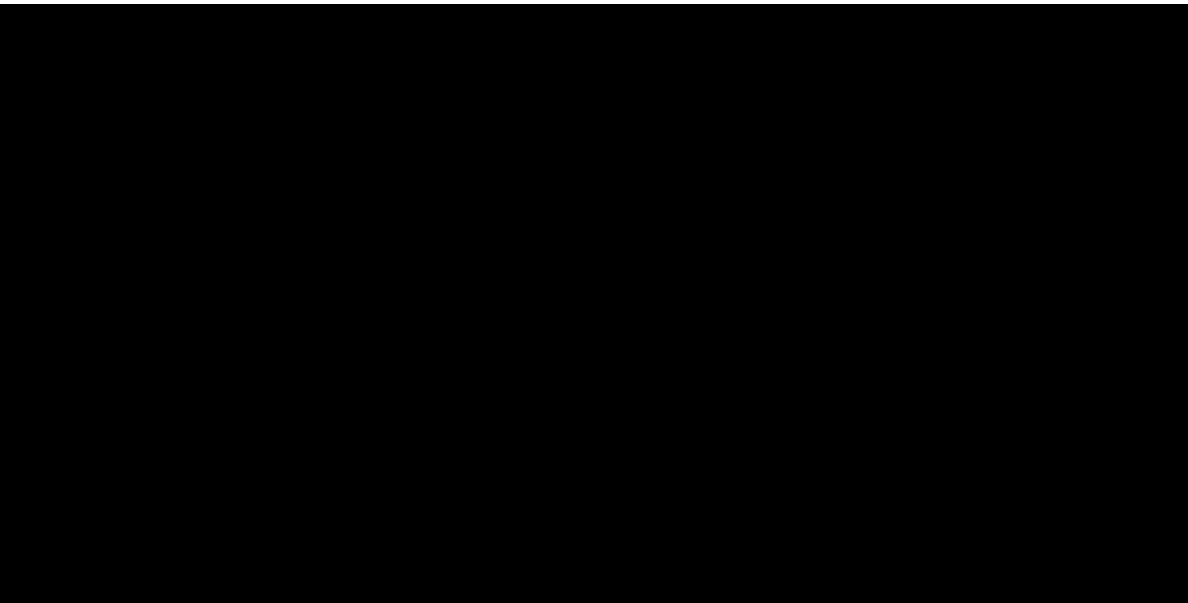

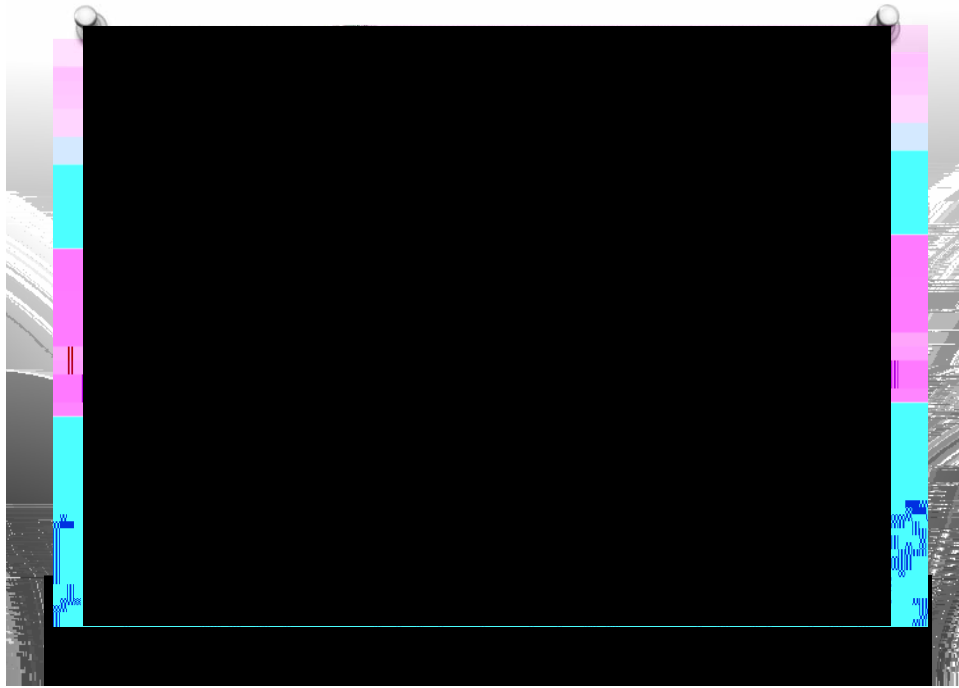

- a) a) Focused on highest risk areas at primary schools
- b) b) Work ongoing during school year on weekends

Contracted with independent, third party to perform site investigations of

Hayhurst School Recap

- Parent expressed concern

Radon Testing

- Radon Plan and results on-line at pps.net/healthyschools

- Testing will be completed ahead of January 1, 2021 OHA requirement

-

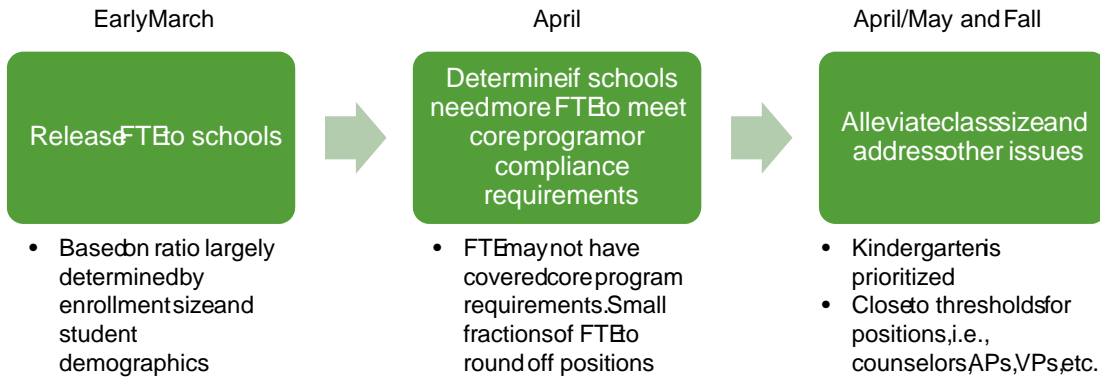

Environmental Health and Safety Hazard Focus List

- Water Quality
- Lead-Based Paint
-

Staffing Update

SEPTEMBER 27, 2016

Staffing Process Simplified

FTE (Full Time Equivalent) – One FTE is a regular staff position (Administrative, Certified and Classified)

Guidelines for Addressing Class Size K-5

- Kindergarten

- "If average Kindergarten class size exceeds 25 students, then allocation of additional resources

BigPicture

- ReleasedFTEearlier
- Varietyof requestsfor more FTE
- Districtcontextto not createinequality
- NoFTBleft

HighSchoolStaffing

Thereare a variety of factorsthat go into highschoolstaffing, and PP&S staff has
