

# CHILD CARE AND PRESCHOOL PANDEMIC INFLUENZA PLANNING CHECKLIST

A pandemic is a global disease outbreak. A flu pandemic occurs when a new influenza virus emerges that people have little or no immunity to and for which there may be no vaccine. The disease spreads easily person-to-person and causes serious illness. It can sweep across the country and around the world very quickly. It is hard to predict when the next flu pandemic will occur or how bad it will be.

Child care and preschool programs can help protect the health of their staff and the children and families they serve. Interruptions in child care services during an influenza (flu) pandemic may cause conflicts for working parents that could result in high absenteeism in workplaces. Some of that absenteeism could be expected to affect personnel and workplaces that are critical to the emergency response system. The U.S. Department of Health and Human Services (HHS) and the Centers for Disease Control and Prevention (CDC) offer this checklist to help programs prepare for the effects of a flu pandemic. Many of these steps can also help in other types of emergencies. More information on pandemic flu is available at [www.pandemicflu.gov](http://www.pandemicflu.gov).

## 1. Planning and Coordination:

Completed	In Progress	Not Started	
			Form a committee of staff members and parents to prepare

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

## 2. Student Learning and Program Operations:

### 3. Infection Control Policies and Actions:

Give special attention to teaching staff, children, and their parents on how to limit the spread of infection. (For example, use good hand washing; cover the mouth when coughing or sneezing; clean toys frequently.) Programs should already be teaching these things to build habits that protect children from disease. (See \_\_\_\_\_
